These experiences are offered with a consistent structure that is developmentally appropriate for this age group. The young dancers will practice cooperation, collaboration, and attain a sense of accomplishment through the joy of creative dance.

Dance Practice (more how, less what) with Eric (adults 18+)

Wednesdays 9-10:15am

What if organizing, reorganizing, and disorganizing our embodied selves allows us to arrive in our dancing? In this movement class we'll practice the multiplicity of ways that we can be in relationship while dancing. We'll wildly move through space, mess with time, destabilize our habitual patterns and make room for risk-taking and aliveness. We will be together, we will share, we will make mistakes and offenses, we will apologize earnestly, we will check ourselves, we will keep dancing. I like to imagine the dance class as a space of negotiations. Let's enter with the bodies that we have and give ourselves permission to be in many kinds of Otherness. I trust that something magnificent will happen.
